

Qaisar Ali

Leading BI & Analytics Strategy

Toronto, ON • 437 922 1877 • ali.qaisar@gmail.com • linkedin.com/in/aliquaisar

PROFESSIONAL SUMMARY

Results-driven Data and Analytics Leader with over eight years of experience in business intelligence, data strategy, and advanced analytics. Expertise in delivering scalable BI solutions, cloud data platforms, and AI/ML-driven analytics, including predictive modeling, forecasting, and NLP-based sentiment analysis. Proven track record of leading high-performing teams, driving data-driven decision-making, optimizing reporting processes, and translating complex business challenges into actionable insights that improve operational efficiency and deliver measurable business outcomes.

PROFESSIONAL EXPERIENCE

GS1 Canada | Business Intelligence Manager

Oct 2024 – Present

- Act as subject matter expert for the analytics and BI function, advising business leaders across Sales, Operations, and Customer Success on program design, data governance, and performance tracking.
- Lead development and management of core business programs including KPI scorecards, performance dashboards, and reporting suites, ensuring alignment across stakeholder groups.
- Conduct independent analysis to identify emerging issues and trends, providing insights and recommendations that inform strategic planning and business priorities.
- Design and deliver training programs to build data literacy across business teams, driving adoption of BI tools and embedding analytics into day-to-day decision-making.
- Coordinate change management activities including readiness assessments, stakeholder engagement, execution planning, and sustainment of new initiatives.
- Develop tailored communications and presentations for executive audiences, translating complex analytical outputs into clear narratives and actionable strategies.
- Partner with technical and business teams to operationalize AI and machine learning use cases, managing delivery end-to-end from scoping through post-implementation review.

GS1 Canada | Data Analytics Lead

Apr 2022 – Oct 2024

- Served as a consultative analytics partner to HR, Operations, Finance and commercial leadership, helping determine business priorities and the best sequence for executing group strategy.
- Led demand and performance forecasting initiatives, presenting model outputs and business implications to non-technical senior stakeholders.
- Built a centralized Power BI reporting framework, standardizing KPI definitions across functions and enabling self-serve insight access for sales and operational teams.
- Defined segmentation strategies and customer analytics in partnership with cross-functional teams, feeding insights into commercial planning and customer strategy.
- Supported change management as new tools and dashboards were introduced, facilitating training sessions and developing enablement materials to drive adoption.

GS1 Canada | Senior Data Analyst

Apr 2020 – Mar 2022

- Developed and managed a monthly board reporting suite covering 50+ KPIs, ensuring accuracy and communicating performance trends and recommendations to senior leadership.
- Translated subscriber usage and sales analytics into clear narratives for account management teams, presenting findings in working sessions and executive briefings.
- Applied NLP and Python to analyze customer call transcripts and email data, surfacing sentiment trends and service insights for operational leadership.
- Participated in process improvement initiatives, identifying inefficiencies and recommending enhancements to existing reporting and data management workflows.

GS1 Canada | Data Analyst

Feb 2018 – Mar 2020

- Delivered recurring and ad hoc analytical reporting across commercial business lines, supporting pricing, promotion, and campaign performance decisions using SQL and Power BI.
- Performed gap analysis and feasibility studies for data infrastructure projects, presenting findings and recommendations to business and technology stakeholders.
- Helped coordinate data governance activities, ensuring alignment and integration of data across reporting systems.

Amadeus IT Group | Senior Data Analyst

Jun 2015 – Sep 2017

- Identified over \$2.5M in business opportunities through commercial data analysis, customer segmentation, and ROI modelling, communicating findings to senior leadership.
- Developed BI reports and competitive intelligence dashboards across datasets of 8M+ records, enabling data-driven decisions on product campaigns and market strategy.
- Analyzed business opportunities and recommended tactics to improve sales force effectiveness, working closely with commercial leadership on program design.

Travelport | Data Analyst

Mar 2014 – May 2015

- Produced daily, weekly, and monthly performance reports to support business development decisions.
- Supported automation of an in-house management reporting tool, improving scalability and reducing manual effort.
- Built BI visualizations for senior management to support decisions on product campaigns and ROI.
